

## Help File

Step 1:

Install the node.js latest version

Step 2:

`npm install @google-cloud/dialogflow"`

Step 3:

`npm install uuid`

Step 4:

`npm install express body-parser`

Step 5:

You need to run "node app.js" in the terminal so make sure the terminal opens in the same folder in terminal where the app.js is places.

After this server will go online and now you can use the bot

Step 6:

Open the index.html and click on the "Ask your Query" button and the Chatbot will appear now you can ask for your questions.

Thank you!
